STD: Standard √: Available ○: Optional ×: Impossible

Notes:

- All ratings are for guidance only, please refer to the specific genset technical data sheet for final power ratings.
- 208V/480V: Selection of ATS models is calculated on the basis of 208V or 480V, for other voltages, please consult PowerLink before ordering.
- All ratings data based on operation under ISO 8528-1, ISO 3046, DIN6271 conditions using typical fan sizes and drive ratios. Performance tolerance quoted by PowerLink is ±5%.
- Prime Power = Power at available load in lieu of main power network. An overload of 10% permitted for one hour in every twelve hours of operation.
- Standby Power = Power available at a variable load in the event of a main power network failure up to a maximum of 500 hours per year. No over load is permitted.
- Rated power factor: 0.80.
- N/A: Not Available.

PowerLink reserves the right to make changes in model, technical specification, color, configuration and accessories without prior notice. Please contact your sales team before ordering.
